Product Designer & Design Engineer

12+ years designing and engineering SaaS products at scale. I build design systems from scratch — token architecture, component libraries, governance — and close the gap between design and front-end development. Currently the sole designer at a global fintech platform operating in 160+ countries, owning the full design system end-to-end.

Key Achievements

40%	Reduced design-to-development handoff time at Ria by building a complete design system from zero — tokens, components, documentation — where none existed before.
10K–100K	Users served by the B2B SaaS platform I designed solo, operating across 160+ countries.
60+	Documented components built and governed for Openbank (Santander Group), with full 3-layer token architecture and design-to-code parity with React teams.
~30%	Reduction in low-value components at Openbank after introducing UI analytics to inform roadmap decisions.

Experience

Mar 2023 – Present

Ria Money Transfer · Euronet

Lead Product Designer · Sole Designer

- Built a complete design system from the ground up — zero to production — including token architecture, 40+ components, and contribution guidelines, reducing design-to-dev handoff by 40%.
- Sole UX/UI designer for a B2B SaaS platform used by 10,000–100,000 agents across 160+ countries, owning every design decision end-to-end.
- Established WCAG 2.1 AA as the accessibility baseline across all components; conducted audits and embedded a11y into the design-to-code workflow.
- Aligned design and front-end development for the first time: introduced shared token language now being implemented directly in Storybook.
- Drove cross-functional design culture in an organisation with no prior design system practice.

Senior UX/UI Designer · May 2022 – Feb 2023

- Redesigned core transaction flows and scaled Figma component libraries across teams.

Apr 2020 – May 2022

Openbank · Santander Group

Design System Specialist + UI Analytics Sr. Analyst

- Architected and maintained a production design system for Spain's leading digital-native bank: 3-layer token system, 60+ documented components, full React parity.
- Introduced UI analytics to measure component adoption and removed ~30% of low-value components, directly improving the roadmap.
- Led federated governance across multiple product squads; established design-to-code workflows that became the team standard.

Nov 2016 – Apr 2020

Globant

Senior User Interface Designer

- Designed enterprise digital products — apps, dashboards, platforms — for international clients.
- Led UX flows, prototyping, and design delivery; mentored junior designers.

Feb 2012 – Nov 2016

ZED Worldwide

UI & UX Designer

- Designed mobile and web products across multiple verticals: research, wireframing, high-fidelity prototyping.

Skills & Tools

Design Systems
- Token Architecture
- Component Libraries
- Multi-brand Governance
- Documentation & Governance

Product Design
- UX Research
- Information Architecture
- Interaction Design
- High-fidelity Prototyping

Design Engineering
- HTML / CSS
- Design Tokens
- Style Dictionary
- React Collaboration
- WCAG 2.1 AA Auditing

Tools
- Figma Advanced + Variables
- Tokens Studio
- Storybook
- Style Dictionary
- Adobe CC
